

Topical Fluoride for Children (TFC)

HEDIS® Measurement Year 2024

Measure Description: The percentage of members 1–20 years of age who received at least two fluoride varnish applications on different dates of service during the measurement year.

Eligible Population

Members 1-20 years of age as of December 31 of the measurement year.

Product Lines

Medicaid

Data Collection Method

Administrative (claims), Supplemental data

Exclusions

Members are excluded from the measure if they meet the following criteria:

- Members who are in hospice.

Measure Compliance (numerator)

Two or more fluoride varnish applications during the measurement year, on different dates of service.

Two measures are reported: HEDIS and non-HEDIS (core set), which includes different age stratifications per measure.

HEDIS stratification includes:

- 1-2 years.
- 3-4 years.
- Total (the sum of the age stratifications).

Non-HEDIS stratification includes:

- 1-2 years.
- 3-5 years.
- 6-7 years.
- 8-9 years.
- 10-11 years.
- 12-14 years.
- 15-18 years.
- 19-20 years.
- Total (the sum of the age stratifications).
