### For Smokers Only: Why Do You Smoke?

Although smoking cigarettes is physiologically addicting, people smoke for reasons other than nicotine craving. What kind of smoker are you? Knowing what your motivations and satisfactions are can ultimately help you quit. This test is designed to provide you with a score on each of six factors that describe many people's smoking. Read the statements and then answer how *often* you feel this way when you smoke cigarettes. Be sure to answer each question.

2. Total the 3 scores on each line to get your totals. For example, the sum of your scores over lines A, G, and M gives you your score on *Stimulation*; lines B, H, and N give the score on *Handling*; and so on.

**Scoring Chart**

Totals

A	+	G	+	M	=	Stimulation
B	+	H	+	N	=	Handling
C	+	I	+	O	=	Pleasurable relaxation
D	+	J	+	P	=	Crutch: tension reduction
E	+	K	+	Q	=	Craving: strong physiological or psychological addiction
F	+	L	+	R	=	Habit

**What Your Scores Mean**

Scores can vary from 3 to 15. Any score 11 and above is *high*; any score 7 and below is *low*. The higher your score, the more important a particular factor is in your smoking and the more useful the discussion of that factor can be in your attempt to quit.

**Stimulation** If you score high on this factor, it means that you are stimulated by cigarettes—you feel that they help wake you up, organize your energies, and keep you going. Try substituting a brisk walk or moderate exercise whenever you feel the urge to smoke.

**Handling** A high score suggests you gain satisfaction from handling a cigarette. Try doodling or toying with a pen, pencil, or other small object.

**Accentuation of Pleasure—Pleasurable Relaxation** A high score on this factor suggests that you receive pleasure from smoking. Try substituting other pleasant situations or events such as social or physical activities.

**Reduction of Negative Feelings, or “Crutch”** A high score on this factor means you use cigarettes as a kind of crutch in moments of stress or discomfort. Physical exertion or social activity may serve as useful substitutes for cigarettes. Refer back to Chapter 2 for other strategies for dealing with stress.

**Craving or Strong Addiction** A high score on this factor indicates that you have a strong psychological craving for cigarettes. “Cold turkey” is probably your best approach to quitting. It may be helpful for you to smoke more than usual for a day or two so that your taste for cigarettes is spoiled, and then isolate yourself completely from cigarettes until the craving is gone.

**Habit** A high score on this factor indicates that you smoke out of habit, not because smoking gives you satisfaction. Being aware of every cigarette you smoke and cutting down gradually may be effective quitting strategies for you.

**Summary**

Quitting smoking isn’t easy. It usually means giving up something pleasurable that has a definite place in your life. In the end, of course, it’s worth it. Now that you have some ideas about why you smoke, read the Behavior Change Strategy at the end of the chapter for a plan that will help you quit.
