

# Care for Older Adults (COA)

HEDIS® Measurement Year 2022 Measures

**Measure Description: Assesses the percentage of Medicare SNP adults 66 years of age and older who had each of the following:**

- 1. Medication Review – a medication review conducted by a prescribing practitioner or clinical pharmacist during the measurement year which includes a review and the presence of a medication list in the medical record.**
- 2. Pain assessment – a pain assessment during the measurement year, including positive or negative findings, not limited to a standardized pain assessment tool.**
- 3. Functional Status Assessment – a functional status assessment during the measurement year, including either an assessment of ADLs, IADLs, or a standardized functional status assessment tool.**

## Eligible Population

- Medicare SNP members 66 years and older as of December 31 of the measurement year.
- Members who are in hospice are excluded from the eligible population.

## Numerator Codes

The complete NCQA approved code set list can be referenced in the coding guide at <https://www.healthplan.org/providers/patient-care-programs/quality-measures>.

For questions, please contact your practice management consultant. To identify your practice management consultant please refer to <https://www.healthplan.org/providers/overview/meet-practice-management-consultant>.

### \*\*Please Note:

The COA measure is hybrid. Any care not received during the measurement year will result in medical record requests during the HEDIS medical record review project.
