

Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM)

HEDIS® Measurement Year 2023

Measure Description: Assesses the percentage of children and adolescents 1-17 year of age who had two or more antipsychotic prescriptions and had metabolic testing during the measurement year. Three rates are reported:

1. The percentage of children and adolescents who received at least one blood glucose test.
2. The percentage of children and adolescents who received at least one cholesterol test.
3. The percentage of children and adolescents who received both a blood glucose and a cholesterol test.

Eligible Population

- Commercial and Medicaid members 1-17 years of age as of December 31 of the measurement year who had two or more antipsychotic prescriptions.
- Members who are in hospice are excluded from the eligible population.

Numerator Codes

The complete NCQA approved code set can be referenced in the coding guide at healthplan.org/providers/patient-care-programs/quality-measures.

For questions, please contact your practice management consultant. To identify your practice management consultant, please refer to healthplan.org/providers/overview/meet-practice-management-consultant.

Code Type	Codes	Code Description
CPT	80047, 80048, 80050, 80053, 80069, 82947, 82950, 82951	Blood Glucose Test
