## Short-Term Continuous Glucose Monitors

### POLICY PURPOSE:

This policy is designed to discuss the medical necessity criteria for short-term continuous glucose monitors (CGMs). Short-term CGMs monitor, measure, and records glucose levels in interstitial fluid and produce data that show trends in glucose measurement.

### POLICY POSITION:

Requests for short-term (72 hours to one week) continuous glucose monitoring devices services meeting **ANY** of the following criteria may be considered to be medically necessary:

1. For diagnostic use in persons with type I or type II diabetes experiencing either of the following despite conventional insulin dosage adjustment:
  - a. Hypoglycemic unawareness; OR
  - b. Repeated episodes of hypo- and hyperglycemia (<50 and >150 mg/dL respectively) on a daily basis;
2. Pregnant individuals that require insulin therapy or have gestational diabetes;
3. For diagnostic use of either of the following in persons with symptoms suggestive of recurrent hypoglycemia:
  - a. Primary islet cell hypertrophy (nesidioblastosis); OR
  - b. Persistent hyperinsulinemic hypoglycemia of infancy (PHHI, or congenital hypoglycemia).
4. Requests for short term continuous glucose monitoring devices not addressed in this policy are considered to be experimental/investigational, and therefore, non-covered because safety and efficacy has not been established.
5. All requests for short-term (72 hours to one week) continuous glucose monitoring devices require medical necessity review.

# CODING:

Procedure Codes:

CPT Code	Description
95249	Ambulatory continuous glucose monitoring of interstitial tissue fluid via a subcutaneous sensor for a minimum of 72 hours; patient-provided equipment, sensor placement, hook-up, calibration of monitor, patient training and printout of recording.
95250	Ambulatory continuous glucose monitoring of interstitial tissue fluid via a subcutaneous sensor for a minimum of 72 hours; sensor placement, hook-up, calibration of monitor, patient training, removal of sensor, and printout of recording.
95251	Ambulatory continuous glucose monitoring of interstitial tissue fluid via a subcutaneous sensor for a minimum of 72 hours; analysis, interpretation and report.

Diagnosis Codes:

ICD-10 Code	Description
E08.00-E13.9	Diabetes mellitus
O24.011-O24.93	Diabetes mellitus in pregnancy, childbirth, and the puerperium
P70.2	Neonatal diabetes mellitus

## POLICY HISTORY:

Date	Description
8/11/2022	Annual Review: Removed "(less than one week) Coverage Policy" from the title. Moved criteria from Medical Policy Guidance Section to Policy Position section. Revised denial statement. Replaced the Medical Policy Guidance section with a Policy Purpose section which includes a description of CGMs. Added a diagnosis code subsection. Updated Reference section. Added post-payment audit statement and disclaimer.
5/24/2023	Annual Review: In Policy Position "1" added "type I and II" to "diabetes". Added criteria for pregnant individuals. Added "episodes" and changed "at the same time each day" to "on a daily basis" in 1.a. of the Procedure section. Updated references.

# POST-PAYMENT AUDIT STATEMENT:

The medical record must include documentation that reflects the medical necessity criteria and is subject to audit by THP at any time pursuant to the terms of your provider agreement.

## DISCLAIMER:

This policy is intended to serve as a guideline only and does not constitute medical advice, any guarantee of payment, plan pre-authorization, an explanation of benefits, or a contract. This policy is intended to address medical necessity guidelines that are suitable for most individuals. Each individual's unique clinical situation may warrant individual consideration based on medical records. Individual claims may be affected by other factors, including but not necessarily limited to state and federal laws and regulations, legislative mandates, provider contract terms, and THP's professional judgment. Reimbursement for any services shall be subject to member benefits and eligibility on the date of service, medical necessity, adherence to plan policies and procedures, claims editing logic, provider contractual agreement, and applicable referral, authorization, notification, and utilization management guidelines. Unless otherwise noted within the policy, THP's policies apply to both participating and non-participating providers and facilities. THP reserves the right to review and revise these policies periodically as it deems necessary in its discretion, and it is subject to change or termination at any time by THP. THP has full and final discretionary authority for its interpretation and application. Accordingly, THP may use reasonable discretion in interpreting and applying this policy to health care services provided in any particular case.

No part of this policy may be reproduced, stored in a retrieval system, or transmitted, in any shape or form or by any means, whether electronic, mechanical, photocopying or otherwise, without express written permission from THP. When printed, this version becomes uncontrolled. For the most current information, refer to the following website: [healthplan.org](http://healthplan.org).
